Fund Overview

The Fund seeks to invest in a portfolio of equity and debt securities of infrastructure companies, including energy infrastructure companies, industrial infrastructure companies, sustainable infrastructure companies and technology and communication infrastructure companies.

Why invest in the Fund?

- Unique focus on infrastructure for today & tomorrow's economy (e.g. digital/technological infrastructure) along with traditional infrastructure investments
- Focus on responsible and sustainable investments
- Seeks to invest in uncorrelated growth opportunities that are secular vs. cyclical
- Seeks to invest in companies that have high degree of demand inelasticity
- Designed to take advantage of traditional infrastructure investment characteristics (e.g. lower correlation to broader market, high barriers to entry, business activities that are vital to economy, etc.)

*MLPs and MLP investments have unique tax characteristics. In general, an investment in the Fund will not generate unrelated business taxable income (UBTI) for tax-exempt U.S. investors. Neither the Fund nor the investment adviser provide tax advice. Please consult your tax advisor before making an investment.

All investments involve risk, including possible loss of principal. You should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. Additional information regarding the Fund can be found in the Fund's most recent shareholder report. Past performance is not indicative of future results. Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are sold on the open market through a stock exchange. As with any stock, the price of the Fund's shares will fluctuate with market conditions and other factors. Shares of closed-end funds frequently trade at a market price that is below their net asset value. There is no assurance that the Fund will achieve its investment objective. The Fund is subject to numerous risks. Leverage creates risks which may adversely affect return, including the likelihood of greater volatility of net asset value and market value. Energy companies may be affected by fluctuations in the prices of commodities, declines in production or supply sources, a sustained decline in demand, environmental liabilities, changes in regulation and other risks. The Fund will invest in master limited partnerships ("MLPs"). MLPs are subject certain risks inherent in the structure of MLPs, including complex tax structure risks, the limited ability for election or removal of management, limited voting rights, potential dependence on parent companies or sponsors for revenues to satisfy obligations, and potential conflicts of interest between partners, members and affiliates. The potential tax benefits from investing in MLPs depend on them being treated as partnerships for federal income tax purposes. If the MLP is deemed to be a corporation then its income would be subject to federal taxation at the entity level, reducing the amount of cash available for distribution to the Fund which could result in a reduction of the Fund's value. The Fund is not a complete investment program and you may lose money by investing in the Fund. An investment in the Fund may not be appropriate for all investors.
